WORK EXPERIENCE

Function Lead Engineer, Fingrid SubCo at Appzone group- *Dec/2019   - Present* - Lagos, Nigeria

- I currently work with the Fingrid Channels team which is responsible for building the infrastructure and services for processing transactions across digital channels.
- Currently leading the project to build a financial switch wrapper client for third party API integrations.
- Work with technologies including Redis, Kafka, financial transactional messages ISO8583, Grafana.

Software Developer, InfoWARE Limited - *June/2017   - Dec/2019* - Lagos, Nigeria

InfoWARE Limited is a leading enterprise fintech business solutions provider in the capital markets space in Nigeria

- Built and implemented 70% of our third-party API integrations with e.g payments gateways, Salesforce
- Standardization, documentation and continuous improvement of developer processes thereby improving operational excellence
- In a bid to improve financial literacy in the financial markets space, I worked as a fullstack developer on the [Grow My Kudi](#) and [Finance Portal](#) projects
- Co-team lead, Lagos dev escalation team saddled with: issue investigation, bug fixes, product enhancement, liaise with third party developers and development of in-house projects
- Led a team of two engineers to work on a machine learning project for CRM ticket classification using Azure ML studio.
- .

Software Engineer, Hutbay - *Nov/2015 - May/2016* - Lagos, Nigeria

Hutbay is an online real estate marketplace dedicated to helping home buyers, sellers, renters, real estate professionals and mortgage institutions find and share vital information about homes and real estate

- Built an API for watermarking images posted on the platform, which played a very significant role in protecting the copyrights of the company.
- Worked with the senior developers as a feature tester and researcher of interesting features to be added to the platform e.g the watermarking tool which i later built
- Led the support team responsible for providing support to property agents on how to efficiently use the platform.
